

### Remarks

Claims 1 to 6 has been amended to correct grammar and recite more traditional language.

Claim 5 has been amended to one sentence claim.

Claim 7 was added to specify the novel DNA sequence which is encoded of claim 1.

Claim 8 and 9 were added to incorporate claimed matters from previously in claim 5.

Abstract is amended in order to correct grammar.

Specification is also amended in order to remove list of references, correct reference format, identify primers with SEQ ID NO, and correct grammar.

Amendment in paragraph [0001] is made in order to correct priority claim.

Amendment in paragraph [0002] is made to include field of the invention.

Amendment in paragraph [0009] is made to correct grammar.

Amendment in paragraph [00013] is made in order to clarify interpretation of wild type strain to be the same as prototype.

Amendment in paragraph [00015] is made in order to identify primer sequences by SEQ ID NO 2 and SEQ ID NO 3.

For complete of this amendment, I would like to ask for permission to submit amended specification, claims and abstract as attachment of this paper.

Dated: April 08, 2009

Respectfully submitted,

By
